

FRIEDRICH-SCHILLER- UNIVERSITÄT JENA

The laboratory for Bioorganic Analytics invites applications for a fulltime or part-time Metabolomics specialist heading the metabolomics platform of the collaborative research center ChemBioSys (<http://www.chembiosys.de/en/>). The successful candidate will work on a range of instruments including, but not limited to, liquid chromatography coupled to Orbitrap mass spectrometry (LC-MS), gas chromatography-mass spectrometry (GC-MS) and GC qqqMS. The position will support researchers within ChemBioSys but there is also room to pursue an independent research project. We aim to implement and develop new and improved methodologies for the chemical analysis of microbial communities.

Competitive candidates will be expected to work closely with marine biologists and microbiologists to answer questions arising in the field of microbial communication with methods of metabolomics.

You will have a high standard of relevant academic qualifications including a PhD in Analytical, Organic or Biological Chemistry, Microbiology or related fields.

This position is available immediately and initially limited to 2 years.

To apply please forward your cover letter, CV, and contact information of three references to
