

## Researcher Position

A position is available at Centro Cardiologico Monzino ([www.cardiologicomonzino.it](http://www.cardiologicomonzino.it)) in Milan (Italy) for a researcher with a strong background in mass spectrometry. By utilizing integrative mass spectrometry-based metabolomics, and more traditional biochemical approaches, the focus of our group is to highlight metabolic pathways involved in the etiology, progression and treatment of cardiovascular diseases. On the metabolomic side, we are particularly interested in the set up and validation of metabolomic/lipidomic methodologies in different biological matrices such as cells, plasma/serum and urine to perform a systemic analysis of the metabolism. The successful candidate must have:

- A degree in scientific disciplines, preferentially Chemistry or Pharmacy
- A PhD in biomedical sciences or technologies
- A postdoctoral experience in mass spectrometry methods
- Expertise in lipidomics and metabolomics approaches
- Demonstrated ability to work in a team and drive projects forward.
- A track record in mass spectrometry methods and research

To apply, please send CV and a cover letter to [viviana.cavalca@ccfm.it](mailto:viviana.cavalca@ccfm.it)
