

Postdoctoral Fellow / Research Associate in the field of (Bioinformatics / Metabolomics)

BACKGROUND

Two positions (Postdoctoral Fellow / Research Associate) are available in the areas of Bioinformatics and Metabolomics

REQUIREMENTS

PhD or MSc degree in bioinformatics, data science, biostatistics, computing science, or analytical chemistry with bioinformatics training. Candidates are expected to have strong English writing skill with at least one first-author publication in related fields.

At least one of the following criteria must be met:

- Strong experience in using R for statistics and machine learning;
- Strong experience in web-based technologies, databases and data visualization;
- Familiarity with MS-based metabolomics;

LOCALE

Montreal, Quebec, Canada

COMPENSATION

Starting salary: \$47,500 CAN per year, for two years. Renewable for two more years based on performance.

HOW TO APPLY

To apply, submit research statement (1-2 pages, demonstrating fit with the position) and curriculum vitae (max 5 pages, outlining research excellence & capacity in bioinformatics) to Dr. Xia (jeff.xia[at]mcgill.ca).

DEADLINE

Applications will be reviewed immediately until the positions are filled, but no later than Oct. 1, 2017.
