

Research Fellow - Metabolomics

We are looking for an outstanding and ambitious bioanalytical chemist to undertake research in the field of metabolomics and metabolic flux analysis using both NMR and mass spectrometry, including stable isotopes. PhD in chemistry or biochemistry or related fields, or equivalent is required. Experience using analytical chemistry tools and cutting-edge NMR, HPLC or mass spectrometry techniques for global and targeted metabolomics analysis in biological fluids is desirable. The position is available at the Mayo Clinic Rochester, MN, funded by NIH: <http://www.mayo.edu/research/core-resources/metabolomics-nuclear-magnetic-resonance-spectroscopy-core/overview>

Informal enquiries can be made to Dr. Petras Dzeja at: dzeja.petras@mayo.edu
